Objective

Seeking a challenging position in a reputable organization where I can learn new skills, expand my knowledge, and leverage my learnings to contribute to the company's success.

Education

- **B.Tech in Information Technology**, E.G.S Pillay Engineering College, Nagapattinam **2022–2026**
CGPA: 6.73
- **HSC**, SRVS National Higher Secondary School, Karaikal **2021–2022**
Percentage: 60.0%
- **SSLC**, SRVS National Higher Secondary School, Karaikal **2019–2020**
Percentage: 56.0%

Technical Skills

- Programming Languages: Python
- Web Development: HTML5, CSS3, Javascript, React.js, Tailwind CSS
- Database and Backend: MongoDB Atlas, Mongoose, Node.js, Express.js
- Cloud Services: Cloudinary
- Deployment And Hosting: Git and Github, Vercel
- Excel
- Tools: Figma, Android Studio, Visual Studio, Vite, npm /yarn (package managers)

Projects

- **Aasif Pilot – AI SEO Analyzer & Rank Tracker (MERN Stack, Browserbase, Gemini AI)**
Developed **Aasif Pilot**, a high-performance, full-stack search engine optimization and analysis platform integrating the MERN stack with advanced AI and web automation capabilities. Engineered an automated SEO audit engine that utilizes **Browserbase** headless infrastructure for stealth web-scraping and live data extraction, effectively bypassing bot-detection blocks. Integrated **Google Gemini AI via Google AI Studio** to programmatically process scraped page contents, delivering real-time optimization scores (SEO, Performance, Accessibility, Best Practices) alongside actionable technical reports. Designed an autonomous, state-driven backend pipeline with **Node-Cron** to handle daily search engine result page (SERP) tracking and keyword position logging. Features a comprehensive dashboards module utilizing React and Tailwind CSS to visualize historic rank score timelines, total scan quotas, and deep competitor keyword analysis metrics, providing users with end-to-end SEO tracking intelligence. [GitHub](#) — [Live Demo](#)
- **E-Commerce Website (MERN Stack)**
Developed a full-stack e-commerce website using the MERN stack with customer and admin portals. Customer features include account creation, secure login, product browsing, cart management, check-out, order tracking and payment gateways. Admin features include secure login, product management, customer activity tracking (login/logout history), order status updates, and customer impersonation

for testing settings used to change the fonts and theme customization. Implemented MongoDB with Mongoose for data persistence, integrated Cloudinary for media storage, and built a Node.js/Express.js backend to manage APIs and business logic. [GitHub](#) — [Live Demo](#)

- **GYMBROS Premium Fitness Web Application (HTML5, CSS3 (Grid/Flexbox), JavaScript (ES6+, Intersection Observer API))**

Developed GYMBROS, a high-performance, fully responsive premium fitness website utilizing HTML5, CSS3, and Vanilla JavaScript. The project features advanced UI/UX components such as smooth scroll-reveal effects driven by the Intersection Observer API, a fully functional logic-based BMI Calculator, an interactive testimonial carousel, and a custom interactive cursor ring. Built completely from scratch with a mobile-first design architecture using CSS variables and semantic structures, focusing heavily on modern front-end engineering principles and fluid user experiences. [GitHub](#) — [Live Demo](#)

- **AI-Based Smart Energy Management and Carbon Reduction Reward System (Main Project)**

Developed an AI-powered smart energy management system to monitor, predict, and optimize electricity consumption using Long Short-Term Memory (LSTM) models. The system analyzes energy usage patterns, calculates CO₂ emissions, and provides reward points for energy-efficient behavior. Built a responsive dashboard for real-time monitoring, prediction analysis, alerts, and reward tracking.

Technologies Used: Python, FastAPI, TensorFlow/Keras, MongoDB, HTML5, CSS3, JavaScript, LSTM, Pandas, NumPy.

Certifications

- Full Stack Development Course – Datanerdz.AI
- App Development Course – Datanerdz.AI
- Cyber Security Program – NIT Trichy
- Database Management System Course - Infosys Springboard
- Introduction To Data Mining Course - Infosys Springboard
- Computer Vision 101 Course - Infosys Springboard
- Machine Learning And Advanced AI Techniques Course - Alison
- Getting Started With AI Course - IBM
- Data Analytics Using R - IBM SkillsBuild
- Participation Of Cloud Computing Course - Orionshift
- AWS Technical Essentials Certificate

Awards

- Best Student Award in Class – 2022
- Science Expo Best Innovator Award – 2023

Professional Skills

- Time Management
- Adaptability
- Team Work

Languages Known

- English
- Tamil

Declaration
